

Appl. No. 10/619,135
Amdt. Dated 04/05/05
Reply to Office Action of 01/31/05

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A dress shirt comprising:

a collar portion for generally fitting around a neck of a person, said collar portion being suitably sized and shaped for receiving and intercalating a selected portion of a neck tie in such a manner that the selected neck tie portion becomes hidden beneath said collar portion;

a front portion having a centrally disposed longitudinal axis and including a plurality of opposed outer edge portions spaced substantially equally and outwardly from the longitudinal axis, said front portion having a top portion connected to said collar portion and further having a bottom portion spaced from said top portion and disposed generally about below a waist of a person so that said bottom portion becomes tucked inside a user's trouser and maintained at a substantially stable position, said outer edge portions diverging upwardly towards a user's shoulders and laterally extending from said collar portion to equidistant points offset from the longitudinal axis such that said outer edge portions span across the user's shoulders without extending downwardly along a user's arms, said bottom portion including a plurality of arcuate regions detachably conjoinable directly to each other, one said arcuate regions having a diameter greater than another said arcuate regions so that a user can adjustably offset one said arcuate regions away from a center of the user's waist;

a back portion connected to said collar portion and extending downwardly therefrom, said back portion having a bottom portion ending above said bottom portion of said front portion; and

means for removably securing said back portion and said front portion in a stable position on a person, said securing means comprises a first elastic strap having a first end portion directly and permanently connected to one of said plurality of outer edge portions, said first strap having a second end portion directly and permanently

connected to another of said plurality of outer edge portions, said securing means further comprises a second elastic strap having a first end portion directly and permanently connected to a bottom edge of said back portion and extending downwardly therefrom towards a waist of a person, wherein said bottom portion of said back portion has a substantially arcuate shape for assisting the user to freely adjust said dress shirt after positioning a jacket thereover, wherein said second strap traverses said first strap and includes a second end portion axially opposed from said first end portion of said second strap, said second end portion of said second strap extending vertically down a center of a user's back and medially bifurcating said first strap in such a manner that said second strap is directly conjoined therewith so that said first and second straps cooperate with each other and maintain said back and front portion in line during extended use, said second end portion of said second strap being disengaged from said dress shirt and freely positional below the user's waist for promoting comfort.

2. (Original) The dress shirt of claim 1, wherein said front portion comprises:
a plurality of inner edge portions aligned generally parallel to the longitudinal axis and overlap each other.

3. (Original) The dress shirt of claim 2, wherein one of said plurality of inner edge portions includes a plurality of slots spaced from each other generally parallel to the longitudinal axis, another of said plurality of inner edge portions includes a plurality of fastening members spaced from each other generally parallel to the longitudinal axis and substantially aligned with said plurality of slots for interlocking therewith respectively.

4. (Original) The dress shirt of claim 1, wherein the top portion of said front portion has a width that is greater than a width of the bottom portion thereof.

Appl. No. 10/619,135
Amdt. Dated 04/05/05

11. (Original) The dress shirt of claim 10, wherein the top portion of said front portion has a width that is greater than a width of the bottom portion thereof.

12. (Original) The dress shirt of claim 10, wherein said plurality of outer edge portions converge downwardly towards each other and end at the bottom portion of said front portion and generally at the longitudinal axis.

13. (Original) The dress shirt of claim 10, wherein said securing means further comprises a second elastic strap having a first end portion connected to said back portion and extending downwardly therefrom and towards a waist of a person.

14. (Original) The dress shirt of claim 1, wherein said bottom portion has a substantially arcuate shape.

15. (Currently Amended) The dress shirt of claim 8, wherein the first and second end portions of said first strap are directly connected to said front portion each includes a Velcro portion for connecting to each other.

16. (Currently Amended) A dress shirt comprising:
a collar portion for generally fitting around a neck of a person, said collar portion being suitably sized and shaped for receiving and intercalating a selected portion of a neck tie in such a manner that the selected neck tie portion becomes hidden beneath said collar portion;

a front portion having a centrally disposed longitudinal axis and including a plurality of opposed outer edge portions spaced substantially equally and outwardly from the longitudinal axis, said front portion having a top portion connected to said collar portion and further having a bottom portion spaced from said top portion and disposed generally about below a waist of a person so that said bottom portion becomes tucked inside a user's trouser and maintained at a substantially stable position, said outer edge portions diverging upwardly towards a user's shoulders and laterally extending from
